

Why Parents Choose Integrity

Experience

With a therapy staff of more than 15 caring professionals and a combined professional experience of more than 100 years, Integrity stands apart as the experienced therapy team.

Multidisciplinary Approach

Physical, speech, and occupational therapy are taught and practiced as separate disciplines, but so many of the challenges faced by children involve components of each domain. Integrity combines all three therapy disciplines in one location to ensure your child receives the most thorough evaluations and treatment plans possible.

Fun!

At Integrity, children find bright rooms, playful equipment, and smiling faces. Much of the therapy children receive at Integrity is perceived as play. Integrity is a place children love at first sight and want to visit again and again.

What is Physical Therapy?

Pediatric physical therapists work to help children reach their maximum potential for functional independence. They focus on issues of balance, gait, motion, muscular control, and neurology.

Physical Therapy at Integrity Improves These Conditions

- | | |
|---------------------------|---------------------------|
| Torticollis | Autism |
| Functional Scoliosis | Burns & Wounds |
| Coordination Disorders | Milroy's Disease |
| Motor/Developmental Delay | Lymphedema Praecox |
| Traumatic Brain Injury | Bedwetting |
| Orthopedic Conditions | Wearing Pull-ups > 4 Yrs. |
| Neurological Conditions | Constipation |
| | <i>and more</i> |

Physical Therapy Treatments at Integrity Include

- Progressive Resistive Exercises and Range of Motion
- Manual Therapy / Joint Mobilizations
- Balance & Gait Training
- Neuromuscular Re-education
- Various Modalities as Prescribed
- Gross Motor Development
- Home Exercise Program
- Disease/Disorder Education
- Biofeedback Training
- Pelvic Floor Rehab
- Bowel & Bladder Retraining

What is Occupational Therapy?

Occupational therapy focuses on helping children with motor skills development, self-care skills, sensory processing, academic skills, social challenges, and emotional challenges in order to maximize function in everyday life.

Occupational Therapy at Integrity Helps with these Challenges:

- | | |
|-------------------------|-------------------------------|
| Developmental Delay | Sensory Processing Disorder |
| Learning Disorders | Visual Deficits |
| Genetic Disorders | Motor / Coordination Deficits |
| Autism | ADHD / ADD |
| Traumatic Brain Injury | Dysgraphia |
| Cerebral Palsy | Seating & Mobility Issues |
| Neurological Conditions | |

Occupational Therapy Treatments at Integrity Include:

- Self Care Training
