Outpatient  
Physical Therapy

Call Integrity Home Health with your home health referrals, and you will see that Integrity admits and treats homebound patients based only on doctor's orders, medical necessity, and patient acceptance. Integrity Home Health works hard to provide convenience to doctors by not picking and choosing cases based on profitability. For each patient, Medicare pays home health agencies one set amount based on the patient's condition and a minimum amount of visits being made. For this reason, home health agencies tend to avoid cases with too few visits (that will not qualify for a full payment) and cases with too many visits or too long visits (that will not receive extra reimbursement for the extra service). Furthermore, in home health, private insurance is much harder to administrate and pays less. These financial realities can explain why it is harder for doctors and case managers to get needed services for some of their patients.

**From complex cases requiring multiple visits to simple cases requiring fewer visits, you can direct all your home health orders to Integrity Home Health. We work harder to be your convenient and trustworthy home health agency.**

**Integrity Home Health happily accepts orders for:**

-  **Home Infusion** – Integrity will make the entire home infusion process easy for you and your patients. At your request, Integrity coordinates home infusion pharmacy services. Integrity nurses can provide set-up services and initial teaching, 24-hour on-call service, ongoing dressing changes, and lab draws if needed. Initial visits can take two or three hours to properly complete. You can trust Integrity Home Health to put patient care first and to spend the time needed to provide the best possible treatment for your patient.
-  **Private Insurance** – Integrity works with TriCare and other private insurances. Call or fax us with patient information. We will contact the insurance company, get authorization, and let you and/or your patient know in advance the terms of their insurance coverage including out-of-pocket expenses. (Note: Medicare pays 100% of home health – no out-of-pocket expenses).
-  **Incontinence Cure Program** – Available as a home health program and as an outpatient physical therapy program, Integrity's Incontinence Cure program helps women and men manage incontinence through various pelvic floor strengthening techniques and patient education strategies.
-  **Wound Care** – Integrity's nurses and therapists achieve excellent outcomes by putting to use training and experience in the latest wound care management techniques including Wound-Vac®. Consider Integrity for reinforcing teaching on dressing changes and S/S of infection. Also, consider Integrity for effective treatment of your difficult wounds.
-  **Monthly B12 Injections** – Call Integrity when patients have physical or mental limitations preventing reliable self-administration of B12. Integrity admits homebound patients with certain diagnoses for B12 injections. Integrity will train patients or train capable caregivers in the home. If no one can be trained reliably, Integrity nurses will administer the injections.
-  **Diabetic Case Management** – Order this for your newly diagnosed patients so they and their families can receive dietary teaching, teaching on glucose monitoring and insulin injections, syringe pre-fills when necessary, nursing assessments, and more. In addition, order Diabetic Case Management for patients who have long-standing diabetes but have a newly uncontrolled element such as blood glucose, blood pressure, cholesterol, etc.

**Please tell your patients about Integrity Rehab & Home Health**
